OFFICIAL PRODUCT DOCUMENTATION

Full Platform & Plan Comparison Guide

A complete, easy-to-read comparison between **Online (Cloud Web)**, **Offline Desktop (Windows & Mac)**, and the **Android Tablet Offline App**. Choose the ideal setup for your photo studio, wedding photobooth, or trending receipt booth.

QUICK SUMMARY / HIGHLIGHTS AT A GLANCE

- ✓ **100% Offline Capability:** Desktop & Android run without internet at any venue.
- ✓ **Thermal Receipt Printing:** Full Bluetooth support for 58mm & 80mm low-cost receipt booths.
- ✓ **Direct Phone Downloads:** Guests scan a QR code to save photos to their phone without internet.
- ✓ **DSLR & Mirrorless Cameras:** Plug in Canon, Nikon, or Sony cameras with a standard USB cable.
- ✓ **Virtual Assistant Voice:** Friendly spoken countdowns ("3, 2, 1... Smile!") in English & Tagalog.
- ✓ **360 Video Booth:** 30 ready-made designer presets, Auto mode, slow-mo, and 40 animated overlays.

The Three Versions Explained

WEB / CLOUD PLATFORM

🌐 Online Booth

Runs in any modern browser (Chrome, Safari, Edge) on PC, Mac, iPad, or Phone

- **No Installation Needed:** Just open the link, enter your code, and begin taking photos immediately.
- **Pay With QR:** Collect payments easily via GCash, Maya, or ShopeePay before guests shoot.
- **Google Drive Auto-Backup:** Automatic cloud backup of all photos and animated GIFs.
- **7-Day Online Gallery:** Guests get a link to browse and download all event photos online.
- **What's Needed:** Requires a steady Wi-Fi or mobile data connection at the venue.

Best for: Studios with Wi-Fi & iPad kiosks

STANDALONE COMPUTER APP

💻 Desktop (Win/Mac)

Installable software for Windows 10/11 laptops/PCs and Mac (Apple Silicon & Intel)

- **100% True Offline:** Connect to internet once to activate; zero internet needed at events.
- **DSLR & Mirrorless Cameras:** Connect Canon, Nikon, or Sony cameras via USB cable for sharp photos and flash sync.
- **Fast Automatic Printing:** Automatically prints 2x6 strips and 4R postcards silently without pop-up dialogs.
- **Built-in Laptop Hotspot:** Windows laptop creates its own Wi-Fi so guests can download photos without a router.
- **Second Screen for Guests:** Plug in a TV or second monitor via HDMI so guests can see a live view of themselves.

Best for: Pro event rentals, weddings, & high volume

TABLET APP

📱 Android Tablet

Dedicated app for Android tablets (Samsung Galaxy Tab, Lenovo, Xiaomi, and more)

- **Thermal Receipt Printing:** Connects directly via Bluetooth to 58mm & 80mm receipt printers for vintage booths.
- **Kiosk Screen Lock:** Keeps screen awake all day, hides home/back buttons, and prevents guests from closing the app.
- **Built-in Tablet Wi-Fi:** Tablet shares photos directly to guest phones via local Wi-Fi without needing internet.
- **Connects to DSLR:** Plug in Canon, Nikon, or Sony cameras using a simple USB-C adapter cable.
- **Ultra-Portable:** Lightweight, cable-free, battery-powered setup that you can carry anywhere.

Best for: Receipt photobooths & mobile tablet stands

❤️ **Why are Lifetime prices discounted?** We are in active launching mode and value customer feedback above all else. Availing now locks in your lifetime license with free updates forever as new features land. *Check our social media post comments to see real customer reviews and implemented requests!*

CORE HARDWARE CAPABILITIES

Cameras, Printers & Offline Downloads

How each version connects to your photography equipment, printers, and guests' phones without requiring technical setup.

DSLR & Mirrorless Cameras (USB Cable)

Plug your camera into your laptop or tablet with a standard USB cable. The booth controls the camera's shutter button, fires your studio flash or ring light, shows a live camera preview on screen, and transfers sharp photos in seconds.

Desktop: Plug & Play | Android: USB Adapter | Online: Chrome Browser

Thermal Receipt Printers (58mm & 80mm)

Perfect for trending, low-cost receipt photobooths! Print photos onto black-and-white paper rolls (like a store receipt). On Android tablets, simply connect via Bluetooth and print clear vintage photos with zero ink required.

Android: Direct Bluetooth | Desktop: USB or Bluetooth | 58mm & 80mm Rolls

Supported Camera Brands & Models

- **Canon:** Rebel T3i–T8i, 60D, 70D, 80D, 90D, 7D, 5D Mk III/IV, EOS R, RP, R10, R50, R6, and more.
- **Nikon:** D3200, D3400, D5300, D5600, D7100, D7200, D750, D850, Z50, Zfc, Z5, Z6, and more.
- **Sony:** A7 III, A7 IV, A6000, A6400, A6600 (simply set USB mode to *PC Remote*).
- **Webcams & Others:** Any USB webcam or HDMI capture card (Cam Link) is supported.

Canon | Nikon | Sony | Webcams

Photo Printers & Studio Printers

- **Commercial Dye-Sub Printers:** DNP (DS620, RX1HS, DS40 — Desktop & Android USB), HiTi P525L, Citizen CX-02, Sinfonia CS2, Mitsubishi (silent auto-cut 2×6, XL strips & 4R).
- **Portable & Ink-Tank:** Canon Selphy CP1300/1500, Epson EcoTank (L8050/L805/L3210 borderless), **Fujifilm Instax Link Wide**.

Desktop: Silent Auto-Print | Android: Wi-Fi & USB DNP/Epson

Mac Automatic Camera Connection

On Mac laptops, system photo apps can sometimes lock the camera when you plug it in. Our Mac app automatically frees up the camera on launch so it connects right away with zero setup errors or permissions headaches.

Mac App Exclusive | Automatic Camera Fix

Direct Phone Downloads (No Internet Needed)

Both Desktop and Android share photos locally. When guests scan the Photo QR code with their phone camera, they connect directly to the laptop or tablet over Wi-Fi. Photos and videos save smoothly even in basements with zero mobile signal!

Desktop App | Android App | No SIM or Data Needed

Built-in Wi-Fi Hotspot (No External Router Needed)

How guests connect to download their photos in venues with bad phone signal or no venue Wi-Fi:

Windows & Mac Laptops: Turn on **"Make this laptop the booth Wi-Fi"** in **Setup → Share & start** — no router or internet needed.

Android Tablet: Turn on **"Make this tablet the booth Wi-Fi"** in **Setup → Share & start** with a Join QR for guests.

Router / Hotspot Option: Connect to any portable 5GHz pocket Wi-Fi or phone hotspot (no SIM/internet data needed, just local LAN).

EXPERIENCE, CREATIVE & MONETIZATION

Interactive Experience, Design & Payments

From automated voice assistants and roving photographers to cashless PayMongo QR payments and 360 spin desks.

🔊 Virtual Assistant Voice Countdown

A friendly spoken voice counts down to hype up guests and get them smiling: *"Get ready… Three, Two, One… Smile!"*. Available in English and Tagalog voices to keep your photo queue moving fast.

Online | Desktop | Android

🚶 Roving Photographer Mode (Walk & Shoot)

Walk the crowd with a phone or tether a Canon/Nikon/Sony DSLR to the standalone **Roving DSLR Bridge** Android app via USB OTG! Shots stream over 5GHz Wi-Fi straight to the Laptop or Android **Photographer Desk** for instant framing, printing, and Solo QR sharing.

Desktop & Android Desk | Roving DSLR Bridge APK | Pocket Lock + Haptic

🔒 Lock Photobooth (Kiosk Protection)

Prevents guests, curious clients, or kids from messing with booth configurations:

- **Desktop & Online:** Passcode-protected admin settings dock.
- **Android Tablet:** Keeps the screen on all event, hides home and back buttons, and locks guests into the booth screen.

PIN Passcode Lock | Tablet Kiosk Mode | Guest Safe

📸 Live Event Gallery & One-Click Reprints

Operators can open the "All Photos" drawer in the bottom bar at any time to review past captures. Tapping any photo reveals an instant **"Print photo"** button to produce extra copies on demand without opening computer folders.

Desktop: Direct Print | Android: Local Gallery | Online: Cloud Gallery

💳 Payments: QR PayMongo vs. Voucher Codes

- **Online Booth (Pay with QR):** Display a payment QR code on screen for GCash, Maya, ShopeePay, and banks. The booth automatically unlocks the camera once payment is confirmed!
- **Offline Booth (Voucher Codes):** Sell numbered voucher codes at your counter. Guests type the code on screen to start their session.

Online: GCash & Maya | Desktop: Vouchers | Android: Vouchers

🎥 Video Guestbook & Motion Modes

- **Video Guestbook:** Guests record a 5–30 second greeting with clear microphone sound. Generates an instant Video QR code to download.
- **Animated GIFs:** Creates a fun looping animated GIF alongside photo strips.
- **Printable Flipbooks:** Turns short videos into mini printed flipbooks that guests can flip through!

Video Guestbook | Animated GIF | Printable Flipbook

🔄 360 Spin Video Booth & Ready Edits

Complete 360 video studio! Includes **30 Ready-Made Designer Presets** (✨ `Presets`), ⚡ **Auto mode**, 8 speed ramps, 40 animated overlays, custom Canva PNGs, **2-Step Offline QR**, separate **Sharing Station** (`/station`), TV **Live Wall** (`/wall`), and **Spin & Print**.

Desktop Studio | 30 Designer Presets | Station + Live Wall

🎨 Layouts, Canva Frames & Vintage Filters

Choose from 12+ built-in photo layouts (2x6 strips, 4R, single shot, film reels). Upload custom Canva PNG frames with your event's theme and logo, and apply stylish vintage filters (Film, Faded, 70s, Instant, Black & White, Sepia) with optional date stamps.

12+ Layouts | Custom Canva | Vintage Filters

FULL FEATURE MATRIX

Lock Booth (Prevent touching settings)	✅ **PIN Passcode**	✅ **PIN Passcode**	✅ **Full Tablet Lockdown** Screen keep-awake & lock

Choose Offline Desktop when:

You run full-scale wedding or event booths with a DSLR/Mirrorless camera, studio flash strobes, dual screens (TV for guests), and a dye-sub printer (DNP, HiTi) for instant high-volume cutting.

Choose Android Tablet when:

You want an ultra-portable, battery-powered setup, a mobile roving tablet stand, or a trending low-cost **Thermal Receipt Photobooth** printing directly to Bluetooth receipt rolls.

Choose Online (Cloud) when:

Your venue has high-speed Wi-Fi, you want automated cashless QR payments (GCash/Maya) before guests shoot, or you run self-service iPad studio booths with cloud backup.

Choose Online + Offline Combo for:

Maximum business versatility. Handle indoor venue events with no cell service using the Desktop/Android apps, and switch to Cloud Online when hosting self-shoot studios or cashless pop-ups!
